

HENCHMAN HISTORY

Back after their strong international debut «Unmistaken» in 2006, Henchman is stirring up the international rock scene with a strong successor album, containing 13 tracks of emotional, authentic rock, somewhere between alternative and metal.

Henchman's successor album surprises with sophisticated arrangements and touching hooklines, which reveals their great musical potential. US-Producer Sylvia Massy (System of a down, Tool, etc.) gave their songs a distinctive sound once again and put rocking tracks like «Good Friends» as well as quieter moments like «All over again» in the right mood. «Burning Bridges» is their new single, and this tune with its unique feel reveals Henchman's potential. No matter if you listened to rock before, after this you certainly will.

The three handsome swiss guys delivered a no-filler album and developed from a hot underground newcomer act to a serious rock band. Remembering their story: they stepped out of the plane in San Francisco in 2003, with their instruments on their back, knowing that they will spend the next three months in a rusty van and cheap motels. There was only one gig confirmed at that moment, but they didn't care about such details, nothing could spoil their motivation to rock out. And they were right. They made it to two westcoast tours from Seattle to LA, a four weeks European tour and a Live TV show.

Speaking of live: Henchman's live performance is equal to the energy you find on their albums. The charismatic trio not only impresses musically, the handsome guys also catch the viewer's attention with their brilliant live acts, as shown during their last European and American dates.

Originally coming from out of Zurich, Switzerland, the boys have found a second home base in California, where they recorded both albums and absolved two westcoast tours within the last years.

"I was surprised that the three mild mannered, good looking Swiss guys, called Henchman, could tear up the studio with such ferocity! Their songs have such strength and character, with dark, grinding riffs and biting lyrics, a unique sound all their own!"

- Sylvia Massy Shivy, Producer
