Short info:

Basel based industrial rocker completed the recordings for their forthcoming album «**Killove**» (NG 01303-2) with longtime US producer **Scott Ross** earlier this Year. The release in Switzerland is scheduled for the 7th of November 2005 (N-Gage Productions/MV) and the album will hit the stores in Germany and internationally (Rabazco/Soulfood) in February 2006.

The album will feature some surprising material, showing unexpected sides of the band without compromising their full-force approach. Twelve killer songs ready to blow your mind. The video for the first single «**Berlin**» (No. 1) was shot in September in, guess where, Berlin and will be shipped to the TV stations in mid October. Even before its official release, this song has become a smash hit live on stage as well as in the clubs around.

The band will hit the road first in Switzerland and later in Germany, Austria and Benelux in February 2006 - again delivering a vivid performance full of haunting ambience.
CD-Releaseparty is on the **4th of November '05** in **Basel** (Kaserne).
